

Dhiraj Dhungana

Full-Stack/ Backend Developer

Sydney, NSW (Relocating to Tasmania – Available Immediately)

0452386577 | dhirajdhunganaofficial@gmail.com

GitHub: <https://github.com/dhirajdhunganaofficial>

Portfolio: <https://dhirajdhungana.com>

Professional Summary

Full-stack developer with 4+ years of experience building and deploying web applications using React, Spring Boot, Flask, and AWS. Experienced in working across frontend, backend, and cloud environments with a strong focus on practical delivery and system reliability. Open to junior–mid, contract, or support-based roles and ready to relocate to Tasmania immediately.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: React (Hooks, Context API), HTML, CSS

Backend: Spring Boot, Flask, REST APIs

Databases: PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), GitLab CI/CD, Jenkins, Docker

Security: JWT Authentication, Role-Based Access Control

Tools: Git, JIRA

Education

Master of Information Technology

Sydney International School of Technology and Commerce | 2023 – 2025

GPA: 6.31 (Distinction)

Bachelor of Science in Computer Science and Information Technology

Tribhuvan University, Nepal | 2015 – 2019

Professional Experience

Software Engineer (Freelance)

Self-Employed | Mar 2021 – Present

- Built and deployed multiple web applications using React, Flask, and AWS infrastructure
- Designed and integrated REST APIs with frontend systems for real-time data handling
- Managed full project lifecycle from requirements gathering to deployment

- Designed PostgreSQL database schemas and optimized SQL queries
- Implemented CI/CD pipelines to streamline testing and production releases
- Delivered responsive, mobile-first interfaces for business clients

Key Outcome: Delivered stable, production-ready applications with end-to-end ownership and ongoing client support.

Associate Software Engineer

Deerwalk Inc. | May 2020 – Feb 2021

- Developed REST APIs using Java and Spring Boot for internal enterprise systems
- Built and maintained frontend components using React.js
- Implemented JWT-based authentication and role-based access control
- Contributed to CI/CD processes and AWS-based deployments
- Supported CloudWatch monitoring and debugging in production environments

Achievement: Reduced deployment time by approximately 30% through CI/CD improvements.

Software Engineering Intern

Deerwalk Inc. | Sep 2019 – May 2020

- Assisted in developing React-based frontend modules
- Supported Selenium test automation initiatives
- Worked within Agile sprint cycles and production AWS environments

Projects

Personal Portfolio Website

Developed a responsive portfolio website to showcase experience, projects, and contact details. Built with HTML, CSS, JavaScript, Flask, and deployed on AWS with CI/CD.

Live: <https://dhirajdhungana.com>

Automated IPO Alerts System

Built a Python automation to track new IPO listings and email subscribed users. Utilizes Flask, AWS services, and Python automation scripts to deliver real-time alerts.
