Professional Summary

Software Engineer with full-cycle engineering experience across frontend, backend, cloud, and DevOps, supported by a Master of Information Technology (Distinction). Experienced in building and maintaining scalable web applications, APIs, and CI/CD pipelines using React, Node.js, AWS, and modern DevOps practices. Strong product-engineering mindset with hands-on experience across design, development, testing, release, and operations. Passionate about improving customer experience, system reliability, and developer productivity in agile, cross-functional teams.

Technical Skills

- **DevOps & CI/CD:** Git, GitLab, Jenkins, Docker, Terraform, Kubernetes (basic), SaaS integrations
- **Cloud Platforms:** AWS (S3, RDS, CloudWatch, EC2, Lambda, IAM, CI/CD Pipelines)
- **Programming & Scripting:** Python, SQL, JavaScript, React.js, Angular.js
- **Automation & Testing:** Selenium, Bash scripting, Infrastructure as Code (IaC)
- **Observability & Monitoring:** Splunk (basic), AWS CloudWatch, Incident/Alert Management tools
- **Project Management Tools:** JIRA/Determine (ticket tracking, reporting, agile delivery)

Professional Experience

Freelance Software Engineer

Self-Employed | March 2021 – Present

- Designed, built, and maintained **end-to-end web applications using Python (Flask)**, delivering responsive, production-ready solutions for clients across multiple domains.
- Developed **clean, mobile-first user interfaces** using HTML, CSS, JavaScript, and modern frontend practices, ensuring consistent performance across desktop and mobile devices.
- Built and integrated **RESTful APIs** to support frontend-backend communication, enabling scalable and maintainable application architecture.

- Took full ownership of the **software development lifecycle**, including requirements gathering, system design, implementation, testing, deployment, and ongoing support.
- Implemented **test automation using Selenium**, reducing manual testing effort and improving release reliability and speed.
- Automated repetitive workflows and validation processes, improving operational efficiency and reducing human error.
- Applied **secure coding practices** and input validation to ensure application reliability and data integrity.
- Deployed and supported applications using **cloud-based environments** and CI/CD pipelines, ensuring stable releases and easy rollbacks.
- Collaborated directly with clients as a **product engineer**, translating business and user needs into technical solutions and iterating based on feedback.
- Proactively identified performance, usability, and reliability improvements, delivering measurable enhancements to user experience and system stability.

Key Outcomes:

- Delivered multiple production-ready applications with **high responsiveness and availability**
- Improved delivery speed and quality through **automation-first testing approaches**
- Demonstrated strong **product ownership, experimentation, and E2E responsibility**, aligned with agile and fast-paced environments

Associate Software Engineer

Deerwalk Inc. | May 2020 – Feb 2021

- Developed responsive web applications using **React.js** and **Angular.js**, enhancing user experience and accessibility.
- Automated testing workflows using **Selenium**, reducing manual testing effort and improving release cycle efficiency.
- Implemented and monitored **AWS CloudWatch** dashboards, enabling proactive incident management and root cause analysis.
- Managed project workflows and reporting via **Determine**, ensuring transparency and progress tracking.
- Supported deployment processes using **AWS S3, RDS, and CI/CD pipelines**, improving system reliability and reducing downtime.

Key Achievements:

- Streamlined CI/CD deployment, cutting release time by 30%.
- Improved log management and debugging efficiency by leveraging **CloudWatch**.
- Contributed to high-quality product delivery by integrating **automated test pipelines**.
- Gained hands-on experience with **Git workflows**, cloud-based deployments, and **Python/SQL data handling**.

Software Engineering Intern

Deerwalk Inc. | Sep 2019 – May 2020

- Assisted in developing UI components using **React.js** for healthcare analytics applications.
- Supported automation testing initiatives with **Selenium**.
- Learned fundamentals of **AWS cloud services**, gaining exposure to S3 and RDS.
- Contributed to agile development cycles, reporting project progress through **Determine**.

Education

Master of Information Technology

Sydney International School of Technology and Commerce | 2023 – 2025

- GPA: **6.31 (Distinction)**
- Key Subjects: Cloud Computing (80), Big Data (89.5, HD), Advanced Data Analytics (91, HD), Object-Oriented Programming (91, HD), Cybersecurity (78, D), Capstone Project (85, HD)

Bachelor of Science in Computer Science and Information Technology (BSc. CSIT)

Deerwalk Institute of Technology, Tribhuvan University, Nepal | 2015 – 2019

- Score: **70.55% (First Division)**
- Key Subjects: Cloud Computing (77), Data Warehousing and Data Mining (68), Advanced Database Management System (75), Network and System Administration (74), Software Engineering (72), Internship (83)

Certifications

- AWS Certified Solutions Architect – Associate
- GitLab CI/CD Fundamentals
